○ Available Option ● Standard Feature

Self-Adjusting Grinder

Automatically adjusts the coffee grind size to compensate for environmental changes.

iSteam Wand

Intelligent steam wand automatically froths & steams milk. iSteam+ functions up to 35% faster than standard iSteam.

Cold Milk Foam

Delivers amazingly stable cold foam for unique drinks. *Not available with multi-milk or any under the counter configurations.*

Under Counter Grounds Chute

Chute that diverts ground coffee to under counter waste container. *Not available when an under counter fridge is installed directly under the machine.*

Powder Module

Enables machine to deliver up to two types of powder; for example, chocolate for mochas and hot chocolate. *Not available when a Cool Coffee Module is installed on the machine.*

Cool Coffee Module

Rapidly cools coffee after brewing for best-quality iced beverages. *Not available when a Powder Module is installed on the machine.*

Top Milk Fridge

6.5 liter (1.7 gallon) counter top fridge fits perfectly on the left side of the machine.

Quick Milk Fridge

1 gallon counter top fridge with top or side access holes for milk delivery hoses. Milk is siphoned directly from the milk container.

Beverage Air Fridge

Undercounter or workstation fridge that significantly increases milk storage capacity. Includes pre-drilled milk delivery line top access holes.
