

Egro One Daily Coffee Cleaning

1 Tap the clock rapidly 4 times to enter the cleaning program menu.

2 Select the "Coffee" cleaning from the options.
Note: If the machine is connected to a milk storage refrigerator, refer to the Daily Coffee and Milk Cleaning guide.

3 Open the front door, remove the bin, and dispose of the grounds. Wipe the grounds drawer clean, replace the bin, and close the front door. Confirm on-screen that you have emptied the grounds bin.

4 When prompted on-screen, insert one (1) Coffee Machine Cleaning Tablet into the chute on top of the machine.

5 After the automated cleaning has been completed, tap "Exit" to complete the cleaning.

DO NOT SHUT THE MACHINE OFF DURING CLEANING!

It will cause the machine to become disabled and your warranty may be voided. Shutting off the machine will NOT reset the cleaning counter. The only way to unblock a machine that has been blocked due to lack of cleaning is to perform the complete daily cleaning.

Cleaning Product Re-Order Information
