

Meet the Stile: a compact, quiet, and precise grinder from Rancilio. It's equipped with multiple dispensing modes to fit your personal coffee setup.

Choose a dispensing mode to get started!

ACTIVATION BY KEYPAD MODE

Use the touchscreen to start grinding by tapping the **Single** ☐ or **Double** ☐☐ dose presets, or grind continuously by tapping the **Continuous II** button.

ACTIVATION BY PORTAFILTER MODE

Insert the portafilter to start grinding. Tap to select **Single** ☐ or **Double** ☐☐ dose presets or tap the **Continuous II** button to select continuous grinding.

SWITCHING DISPENSING MODES

Hold the **Continuous II** button and one of the dose buttons (☐ or ☐☐) until both icons blink 3 times.

💡 In Activation by Portafilter mode, the dose buttons will only be visible when they are selected.

SETTING DOSE PRESETS

Hold the dose button (☐ or ☐☐) you want to edit. Use the + and - buttons to adjust the dose time.

PAUSING A DOSE IN KEYPAD MODE

Tapping the **Continuous II** button in Keypad mode will pause your dose. Tap the same button again to resume.

PAUSING A DOSE IN PORTAFILTER MODE

Removing the portafilter (so that the button isn't pressed) will pause the dose. Reinsert the portafilter to resume.

ADJUSTING GRIND SIZE

To change the grind size, turn the adjustment ring. Turn clockwise to make the grind coarser and counterclockwise to make the grind finer.

💡 The grinder should be running while adjustments are being made. The simplest way to do this is with continuous grinding in Keypad mode.

CLEANING GUIDELINES

Remove hopper by extending the shutter and wash it with soap and water. Use a soft brush to remove old grounds and wipe the outside of the unit with a damp cloth and a mild cleaning solution if needed.
